Digital Age Enterprise Needs

Digital Age TI Maturity

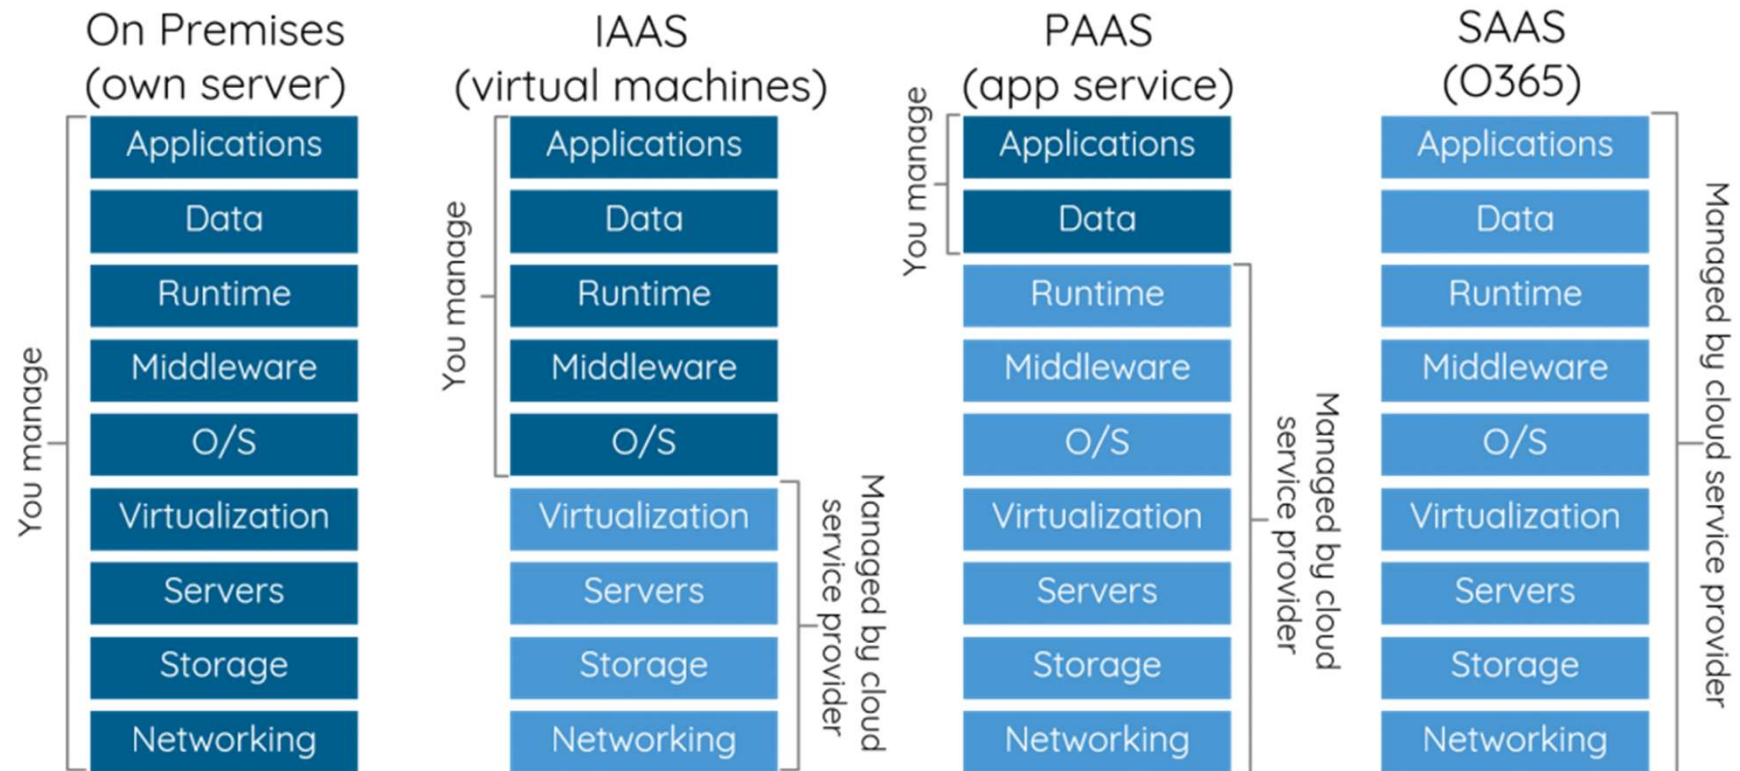

Cloud Service Providers (CSP)

¿Titans?

Cloud Services Models

Cloud Services Problems (CSP)?

Clave: racionalizar y adoptar el modelo de aaS
para focalizarse en el negocio

2014...

- Continuo => **Resilient**
- Escalable => **On-Demand**
- Virtualizado => **Flexible**
- SOA => **100% aaS & API**
- IOA => **100% Interconnected**

- Consolidar las plataformas TIC
- Modernizar el núcleo de TIC
- Virtualizar la infraestructura TIC
- Automatizar los procesos TIC
- Desplegar híbridamente las TIC:
 - **Self-Service** (Nube Pública)
 - **Managed-Service** (Nube Privada/**Off-Premises**)
- Orquestrar las TIC para el Negocio

...2018

Identifique un aliado de tecnología que le ayude
a implementar rápidamente la nube para su negocio

Cloud Services Problems (CSP)?

Clave: entienda los costos e implicaciones contractuales de los servicios de la nube pública

Gartner.

Defina lo que compra

Implemente
Pilotos

Evalúe costos de Instalación

Soporte Premiun

Seguridad de datos:
Respaldo y Recuperación

Finalización y Asistencia de Salida

Costos de mantenimiento y soporte

En sus predios:
Licencias
Conversiones
Legalidad
Auditoría

Costos de ambientes de prueba y almacenamiento

Pago por consumo

Costos de Personalización e Integración

Costos de Clientes o Aliados de Negocio

2014...

...2018

La nube pública es una alternativa válida a la nube privada previa evaluación integral antes de la toma de decisiones

Cloud Services Problems (CSP)?

IaaS

Low Value

PaaS

DevOps

SaaS

High Value

CloudArch

Cloud Services Problems (CSP)?

- Lack of:
 - Knowledge & Expertise
 - Time to Try & Learn The Cloud
 - Real Cloud Enabled & Native TI (Legacy)
 - Value Proposition Understanding
 - Multi-Cloud Connetivity & Integration
- Cloud still has TI complexity (Hundred of New Features Every Year)
- Missing Real Value Seeding & Harvesting!

2018...

¿Dónde están los humanos?

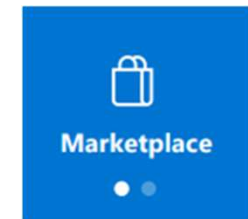

Cloud Services vs. Real Users

- **CloudArch:**
 - Architects, Managers, Financials (Billing).
- **DevOps:**
 - Developers
- **SysOps:**
 - Systems Administrators & Operators.

Cloud Managed Services

Flavors:

- Standard
- Special Projects
- Advisory

Scope (Standard):

- User Guide (What)
- Specifications (How)
- Term & Conditions (Why)

Cloud Managed Services (Standard)

- **CloudArch:**

- Design, Sizing, Orchestration, Assessment.

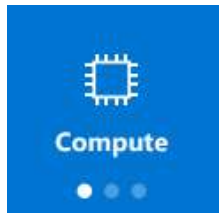

- **SysOps:**

- Systems Administration, Migrations, Life Cycle.

- **DevOps:**

- Applications Development, Build, Deployment.

Cloud Managed Services (Standard)

AWS Elastic Computing
Azure Virtual Machines

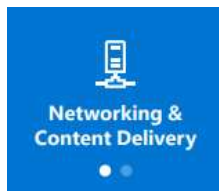

AWS Elastic Computing
Azure Virtual Machines

AWS Elastic Block Storage
Azure Disk storage

AWS Identity and Access Mgmt.
Azure Active Directory aaS

AWS Virtual Private Cloud
AWS VPN Gateway
AWS DirectConnect
AWS Route 53
AWS WAF / Shield
Azure Virtual Network
Azure VPN Gateway
Azure ExpressRoute
Azure DNS
Azure WAF

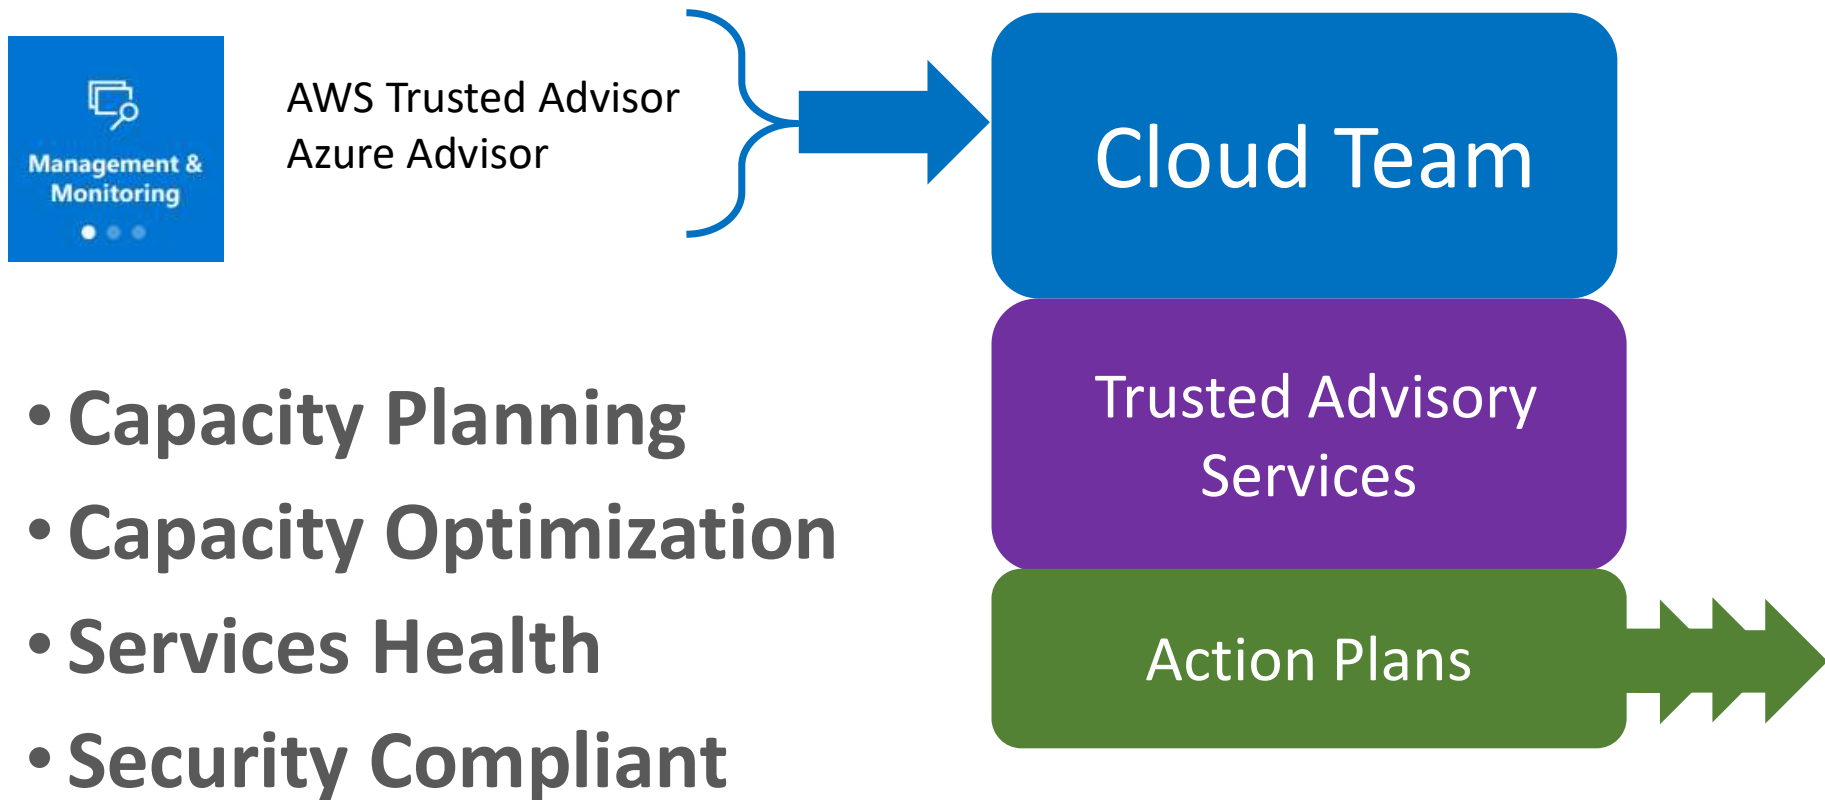

AWS CloudWatch
Azure Monitor

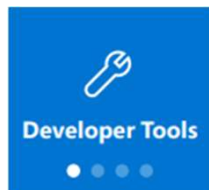

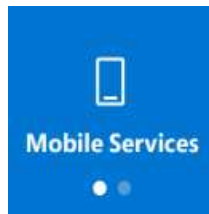

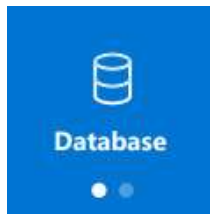

Cloud Managed Services (Special Projects)

- **CloudArch:**
 - Design, Sizing, Orchestration, Assessment.
- **SysOps:**
 - Systems Administration, Migrations, Life Cycle.
- **DevOps:**
 - Applications Development, Build, Deployment.

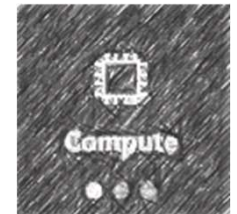

Cloud Managed Services (Advisory)

Cloud Managed Services (Special Projects)

- **Process Logic**
- **Database aaS**
- **Developer Tools**
- **Analytics & Big Data**
- **Internet of Things (IoT)**
- **Mobile Services (AppDev)**
- **Artificial Intelligence (I.A)**

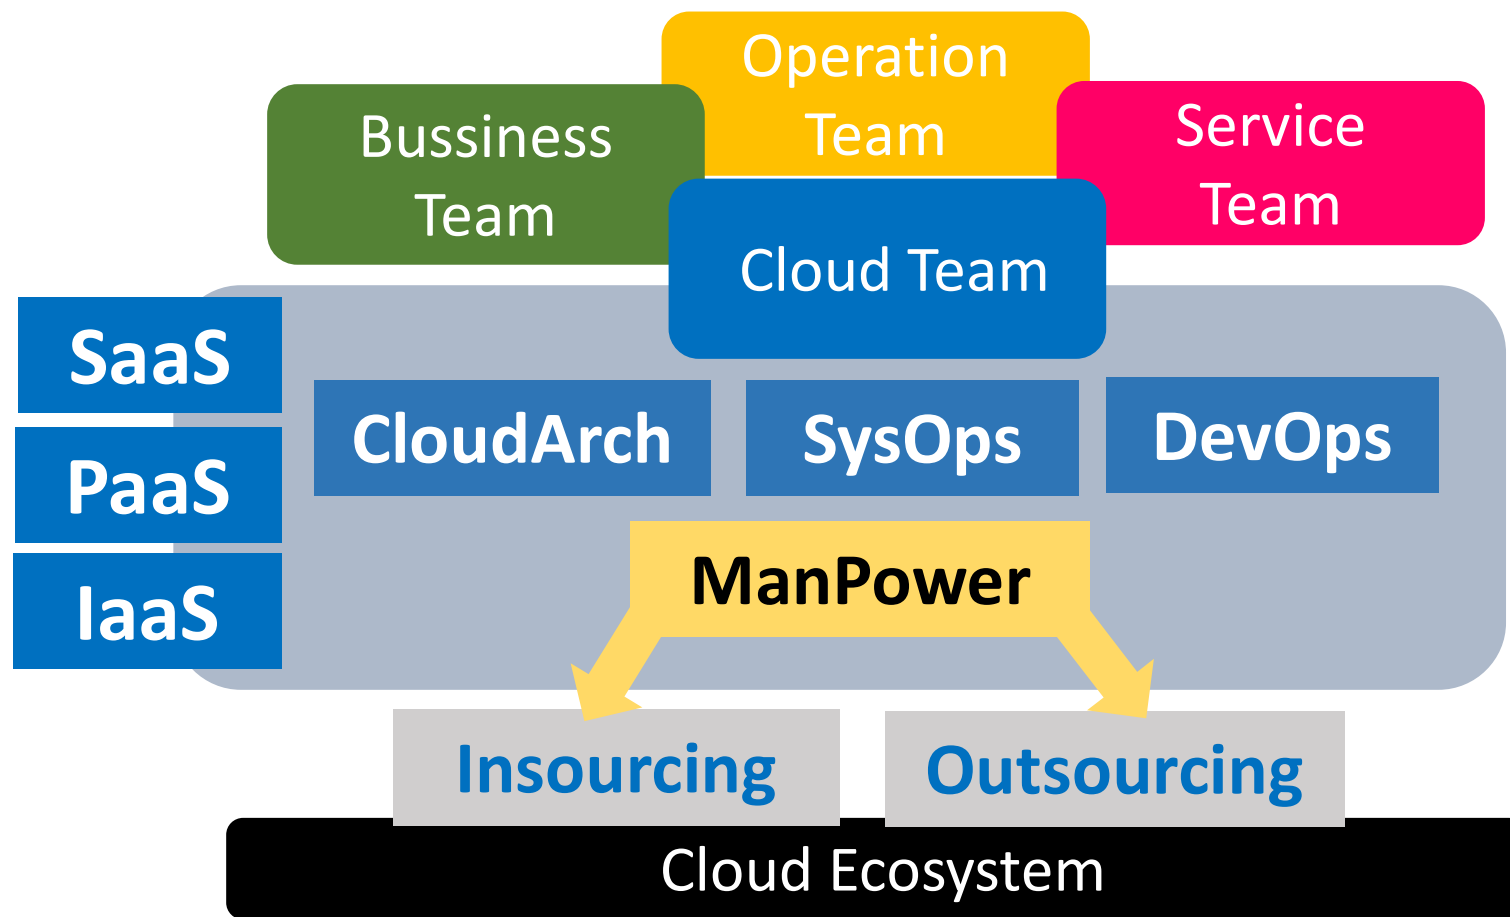

AWS Lambda
AWS Functions

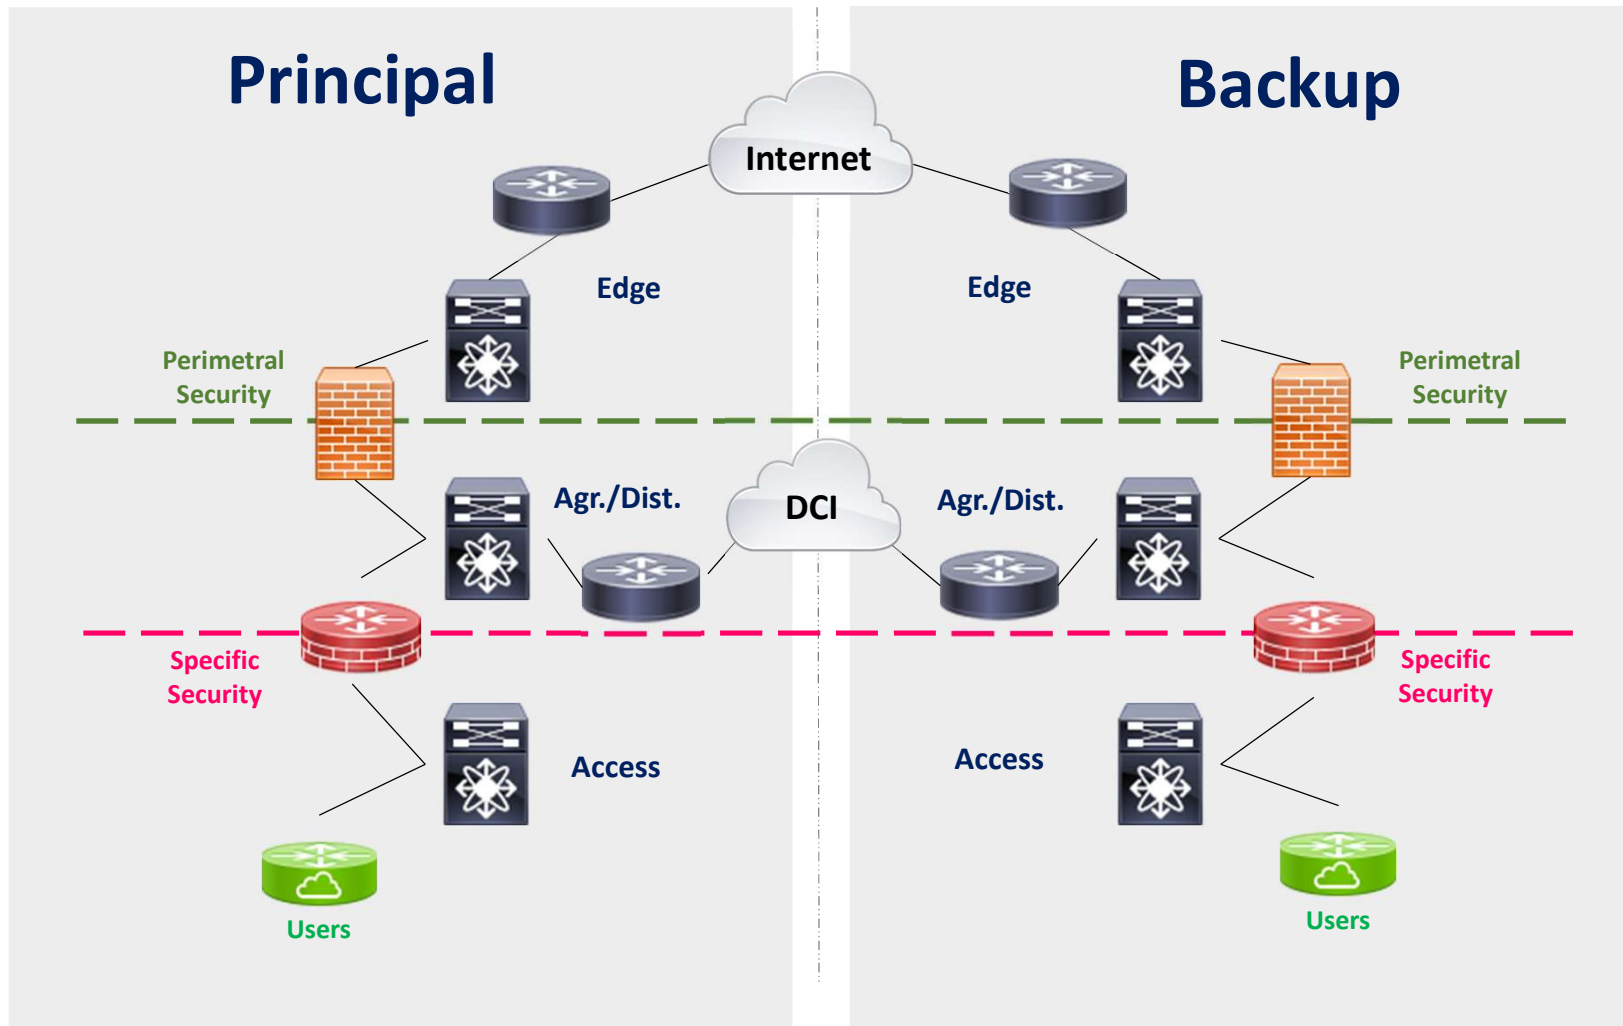

AWS/Azure
Messaging
